Decision Tree Extend vs. Built on Workday

Is the use case a common one in the WD ecosystem?

No, unique to my organization

Yes

Can you work with a configurable product?

No, some complex and/or unique requirements

Yes

How many use cases do you see long term?

We see many future use cases

A few or less

What's your budget flexibility?

Prefer Capex (more upfront cost)

Prefer Opex (recurring license)

Do you have or want to have internal (or partner) capability to build with Extend?

Yes

No

How quick do you need it to be live?

Willing to do a proper project

ASAP

Extend

BoW
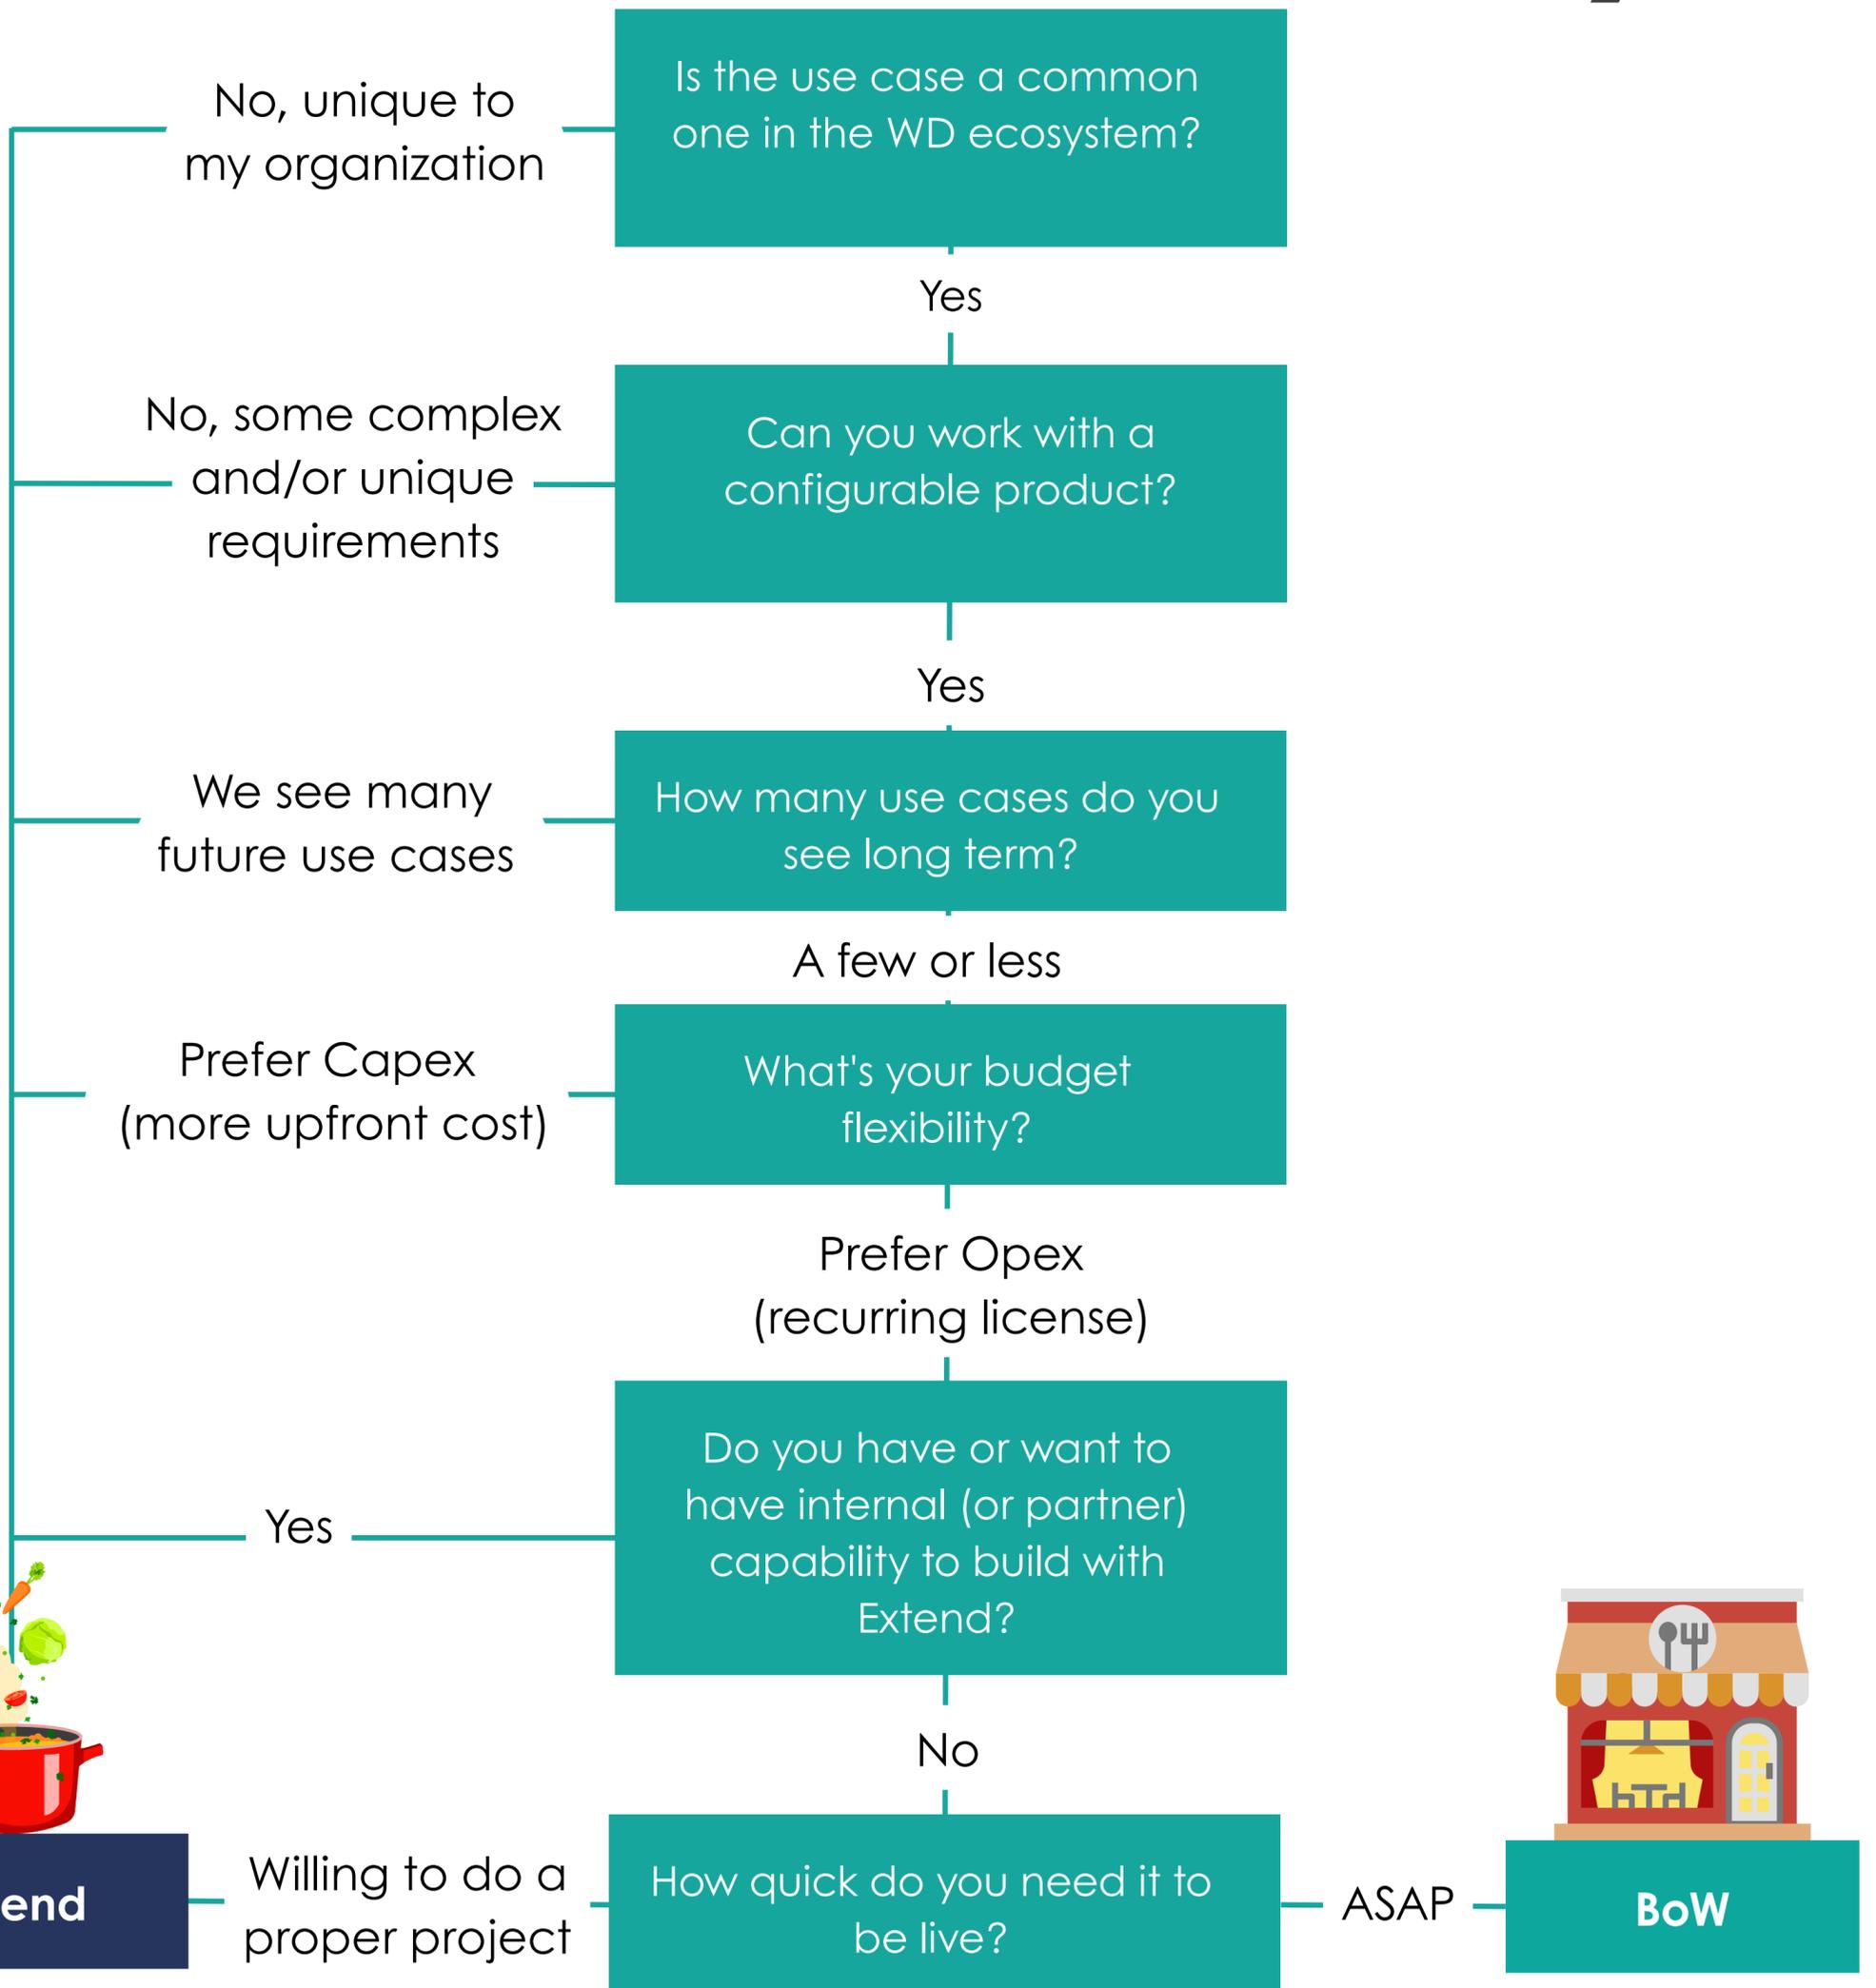

*A hybrid of Extend and Built on Workday can also be an excellent strategy, e.g. starting out with a BOW use case before moving to Extend
