

Orchestrate is General Available

Build integrations
faster, with less
code

**Available
September 20!**

as part of the 2025R2 release.

Self-service enablement

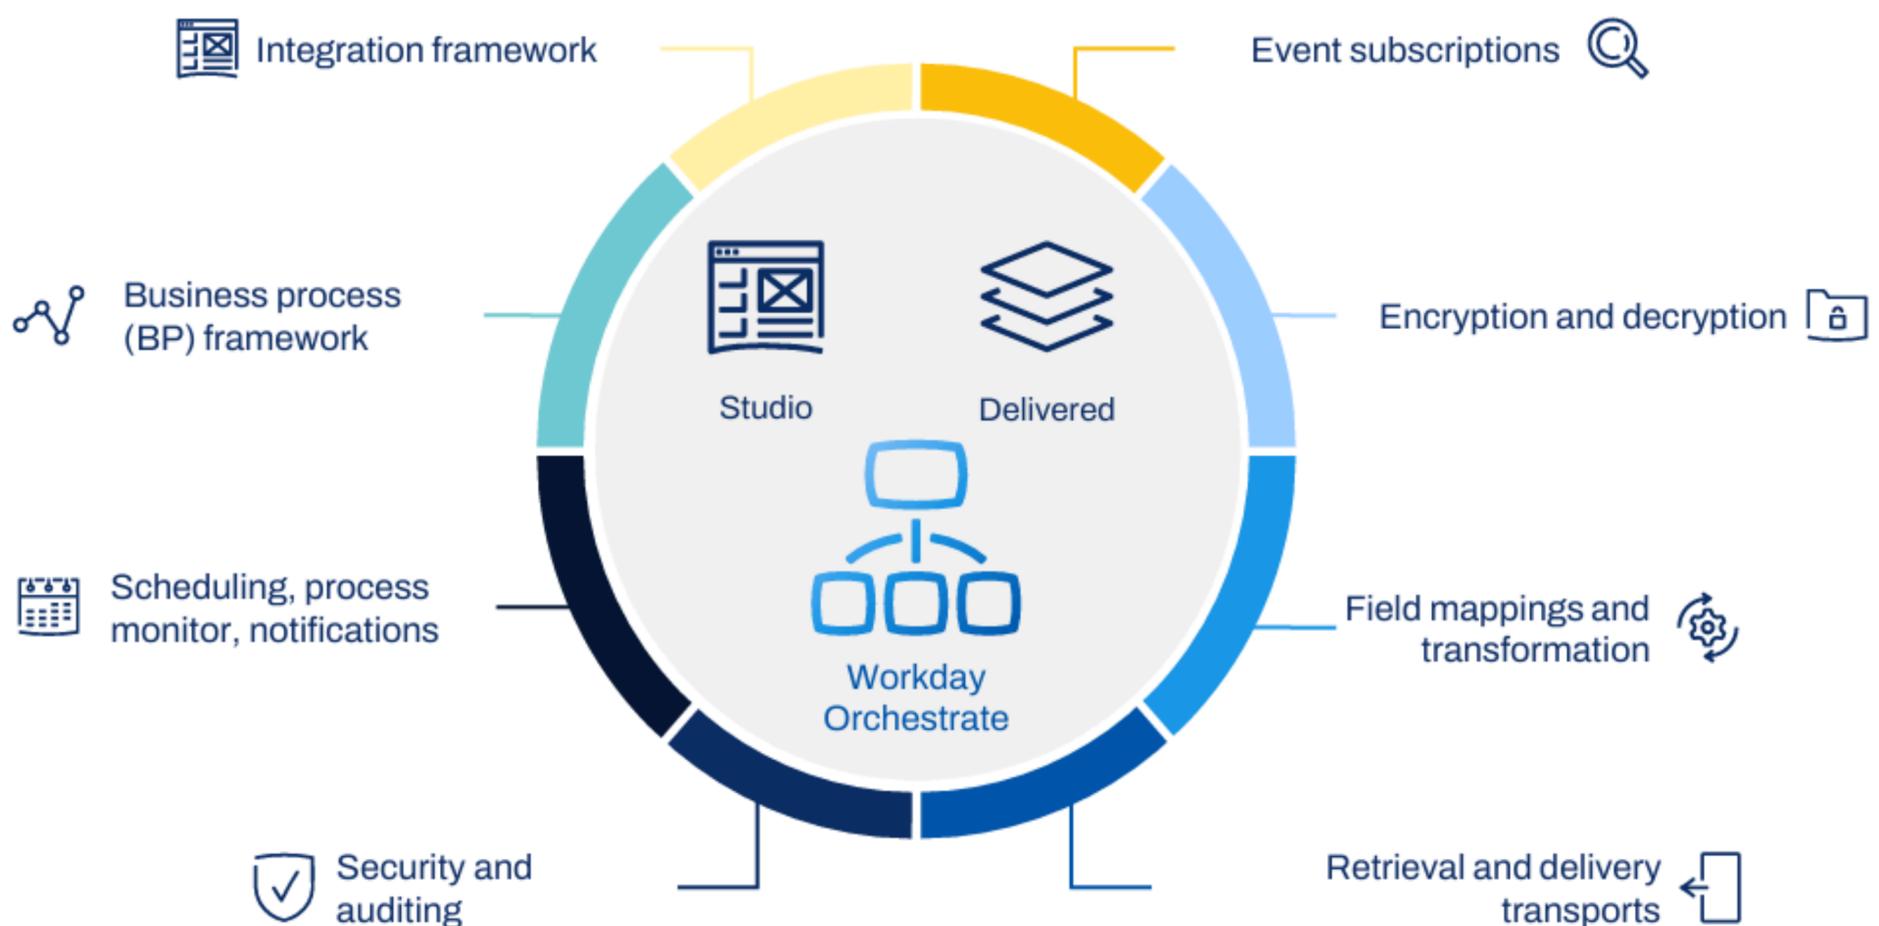

Developer site

ORCHESSTRATE IS AVAILABLE TO ALL
WORKDAY CUSTOMERS NOW

Why customers care and when to use it

- Faster delivery and lower maintenance, no extra infrastructure.
- Broader builder community, still enterprise grade.
- Use Orchestrate for most new custom integrations.
- Keep Studio for complex legacy you already run.
- Use EIB for simple mass import or export.

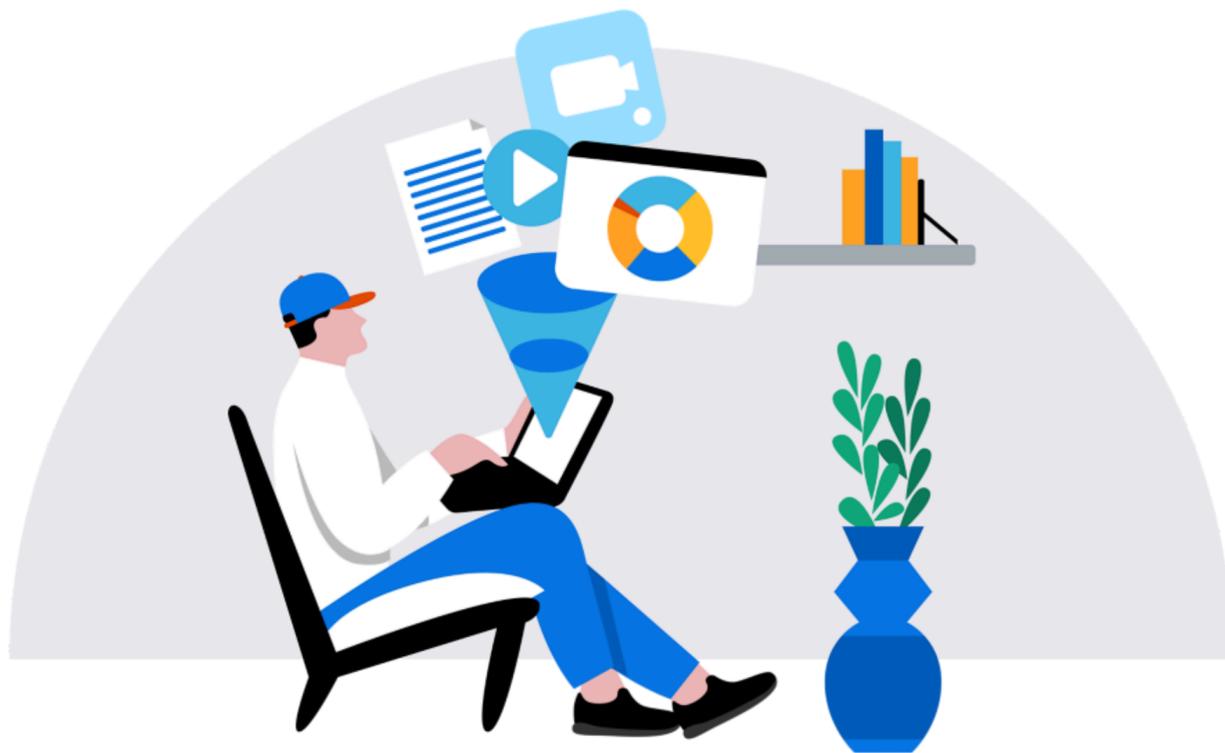

INTEGRATION PARTERNS

Integration patterns you can build

- Event based, trigger from a Business Process.
- Scheduled batch jobs for high volume.
- API to API flows, Workday to external and back.
- Real time and near real time where it fits.

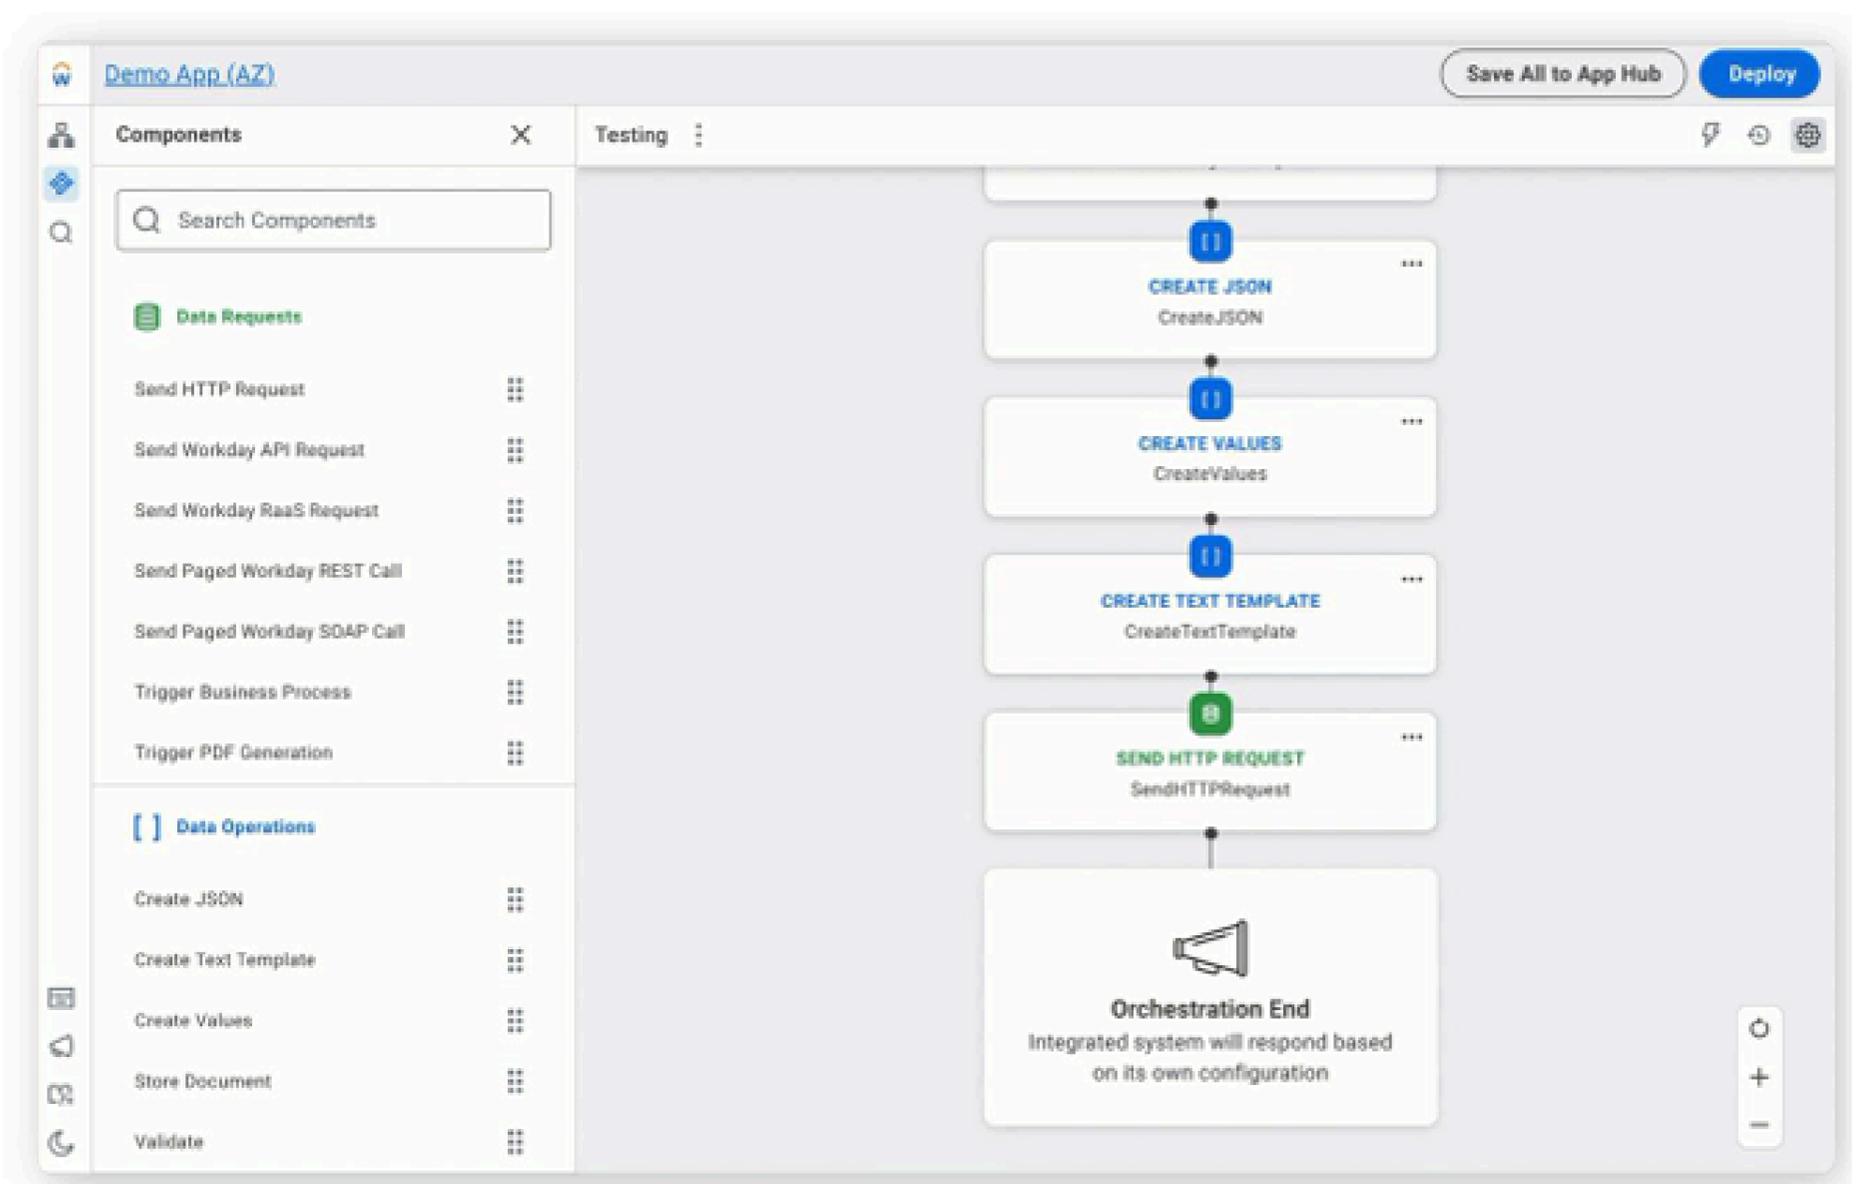

BUILDING IN THE CANVAS

Build productivity inside the canvas

- Orchestration Import to reuse subflows.
- Debugger with live data previews.
- Trigger Integration to start other integrations.
- API polling to support bulk sync patterns.

SUCCESS STORIES

Customer Success Stories with Orchestrate

Target shared how they processed over 100,000 rescinds and corrections with Orchestrate. 75% fully automated.

Lowe's shared 5 Extend + Orchestrate apps, including payslip delivery and drug test automation.

Guild went Studio-free. They built 18 orchestrations in 6 months using templates.

EXTEND + ORCHESTRATE

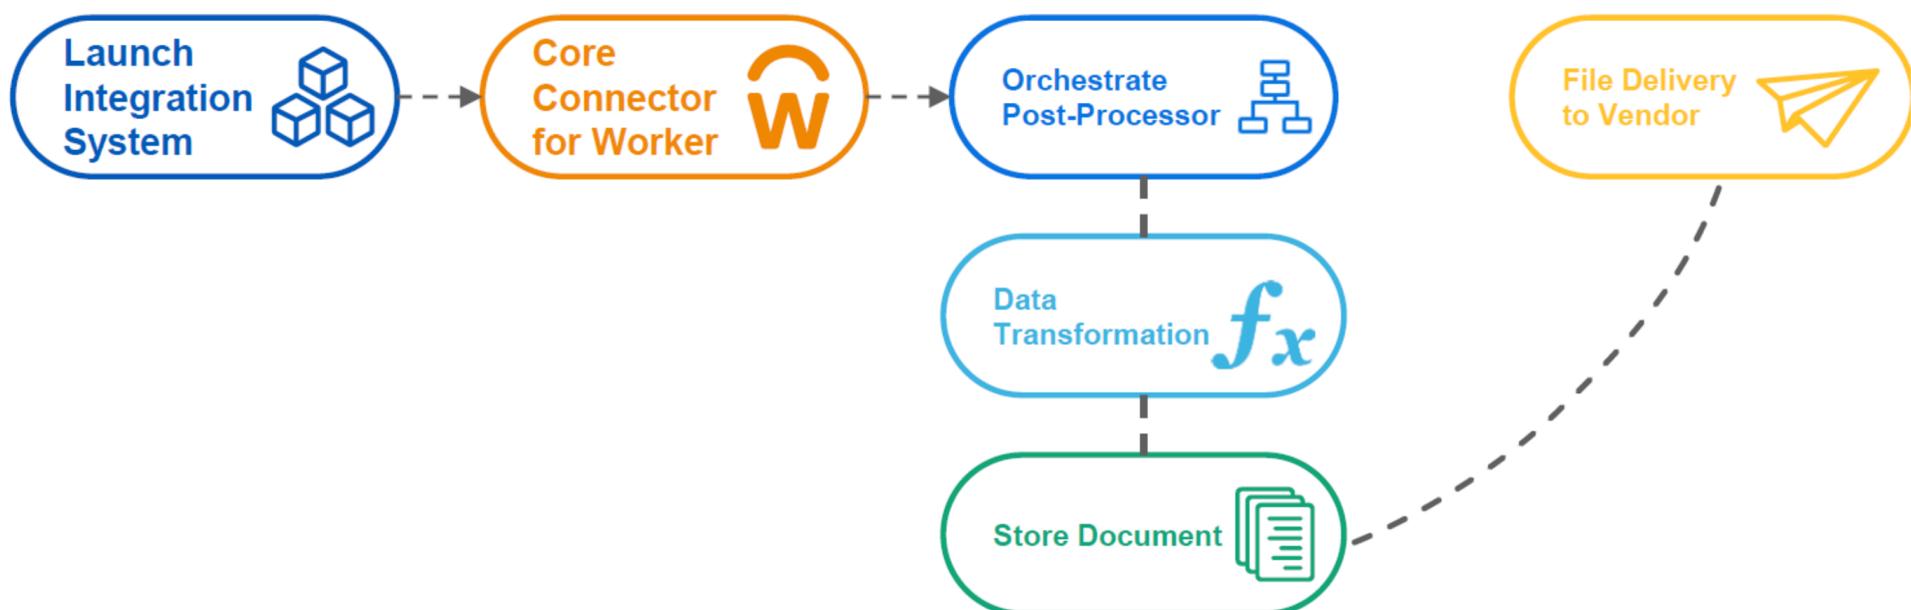

Extend + Orchestrate = Live UX

You can now trigger orchestrations from UI actions.
Examples:

- ✓ Click to generate payslip
- ✓ Click to push job requisition to external board

No more batch jobs. No more status guesswork.

ROADMAP HIGHLIGHTS

Roadmap highlight

Orchestrate Co-Pilot is coming to Extend Pro:

- Generate a flow from plain language.
- Summarize what a flow does for reviews.
- Speeds up design, sharing, and onboarding.
- More to come!

Available now!	Polling
Available now!	BP Triggered Orchestrate
Available now!	Orchestration import
2025R2+	Orchestration debug
2025R2+	Bulk select, delete paste nodes
2025R2+	Trigger Integrate
Future	Dynamic Retrieval/Delivery
Future	Runtime Improvements
Future	Expression builder improvements

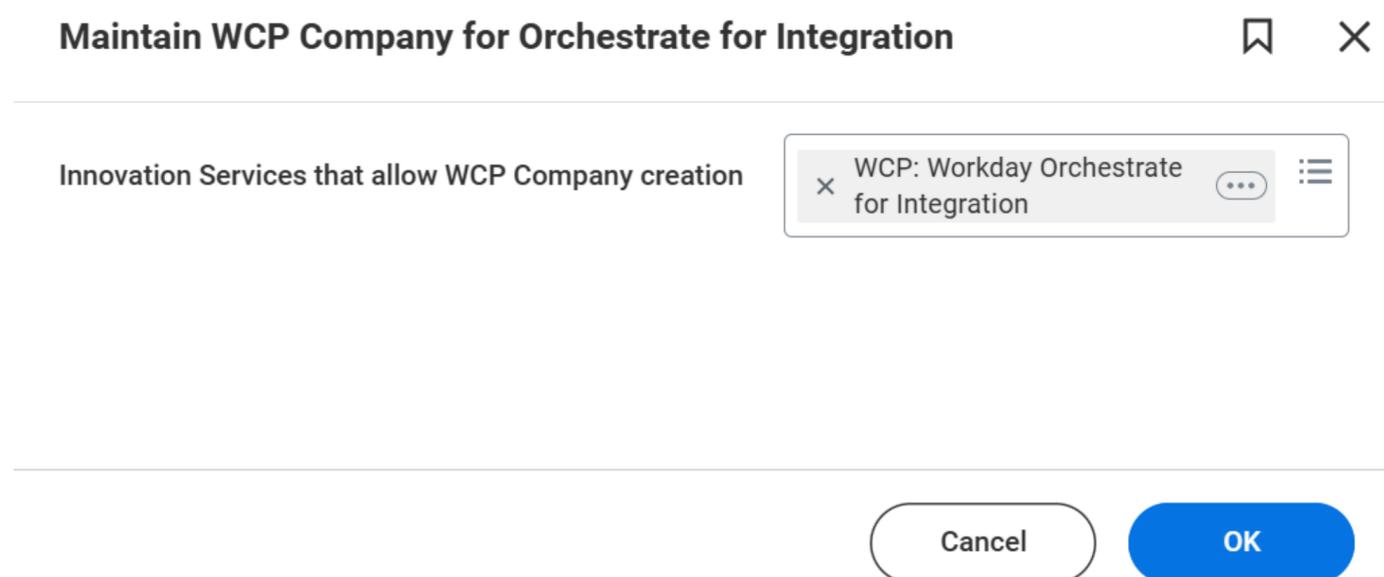

HOW TO GET STARTED

Ready to orchestrate

How to get started:

- Run the Innovation Services and Data Selection Opt-In report, Select Workday Orchestrate for Integration in the WCP section.
- Access the Maintain WCP Company for Orchestrate for Integration task to specify administrator role information. The name and email address you enter should reflect who will act as the administrator for the company on the Workday Developer Site.
